

The Central Florida Council's Covid-19 Response Policies are still in place, however adjustments are being made in keeping with the most current CDC guidance (13 May 2021) and state/local guidelines. The "briefing" below and the details that follow are meant to give campers and staff clear guidance on managing a safe and fun experience for all.

The following updates and expectations apply to ALL CENTRAL FLORIDA COUNCIL programs, events, meetings, and activities. Unless specifically noted as "Camp La-No-Che," all policies/procedures are expected to be followed at any/all functions involving Scouts or Scouters in Central Florida Council.

IN BRIEF

- Camp sanitation protocols remain unchanged. Unit leadership will be briefed on camper expectations at a Leader Meeting after arrival at Camp. Supplies will be available in each Campsite and Program Areas for cleaning purposes.
- Gate access is being opened from 8 am to 8 pm on most days, unless event check in requires a closed gate process. Attendees, visitors, and guests must follow the directions on signage upon arrival and check in at the Office or as directed.
- Temperature checks are being suspended. Camper health monitoring should be managed by Unit and Event leadership.
- Masks are still a requirement for all campers, however they are no longer required when social distancing inside or out is possible or for vaccinated Campers. Voluntary use of masks in all situations is still encouraged. If circumstances do not allow appropriate camper distancing, you will be asked to wear a mask. Masks are available free of charge from all Camp Staff and personnel.
- All Staff, particularly those engaged in food preparation and food service, are still required to wear a mask while engaged in indoor tasks.

POLICY UPDATE DETAILS

The following policies/procedures have been updated recently, based on CDC and local/state guidelines related to Covid-19 control/mitigation. Previous guidelines that are not addressed in this update should be assumed to remain unchanged and in effect until further notice. All current policies and guidelines remain available at www.camplanoche.com/covid-19

ACCESS TO CAMP

All individuals arriving at Camp La-No-Che must check in upon arrival. Events manage a check in station at the start of the event; late arrivals and visitors/guests should check in at the Camp Office. Additional details:

- 1) For weekday & weekend operations, the Camp Gate is open and arrivals should CHECK IN AT MAIN OFFICE unless otherwise noted. For weekends with a number of Units in

Camp, a central “check in tent” will be stationed outside of the Camp Office and staffed accordingly.

- 2) For Weekend Events (district & council level) of more than 100 campers, gate access would be restricted on Friday and arrival check-in will be done at the gate or at Camp Rybolt, depending on group size. Saturday gate access would then follow schedule noted above.
- 3) For Summer Camp, Sunday (arrival) check in will be conducted at Camp Rybolt and gate restrictions will be similar to current; Weekdays (Monday – Friday) would follow schedule as noted in #1 above.

PRE-SCREENING

All persons seeking admission to camp (youth and adults) will be required to complete a pre-event health screening questionnaire, using one of the following methods:

ONLINE SCREENING FORM: Attendees may complete an online screening form up to 48-hours prior to their arrival using the link below. Each person must have a separate screening completed. <https://form.jotform.com/CFCBSA/prescreening>

PAPER FORM: Attendees may complete a paper screening form up to 48-hours prior to their arrival using the form available at www.camplanoche.com/covid-19 Copies will also be available on-site and may be filled out upon arrival.

Check-in Staff and Volunteers will have live access to the online pre-screening data to ensure that all arrivals have completed the necessary steps. Example Pre-Screening

TEMPERATURE CHECKS

Beginning June 1, temperature checks will be discontinued as part of the arrival / check-in process. Additional details:

- Unit leadership are asked to monitor the health of their campers (youth and adults) throughout their stay. A list of problematic symptoms will be posted in each campsite; any campers exhibiting any signs of sickness should be taken to the Health Lodge or Camp Office for a thorough check up.
- Camp Management (campmasters, quartermasters, program staff, health officer, etc.) will have access to thermometers if leadership would like to check any of their campers for fever. Unit leadership are invited to bring their own thermometers.
- Unit leadership will be asked to report on the overall health of their campers verbally at leadership meetings at camp.

MASKS

Based on CDC guidance (13 May 2021) and following state and local guidelines, the following guidance is given to all campers and staff to keep them as safe as possible at camp.

- 1) Masks are not required while outdoors; in outdoor situations where 3-6 feet of distance cannot be maintained, masks are highly recommended.
- 2) Masks are RECOMMENDED while indoors (dining hall, trading post, etc.) especially where 3-6 feet of distance cannot be maintained.
- 3) Masks are also recommended for any campers who are in one or more of the following categories:
 - a. Individuals who are NOT fully vaccinated
 - b. Pre-existing conditions that put you at high risk
 - c. Age/lifestyle that puts you at higher risk
- 4) Camp Staff and those working in the kitchen area (including volunteer meal servers) will be required to wear a mask while engaged in indoor tasks.

In the event of an emergency situation that causes campers and staff to gather indoors (Thor guard, etc.) masks WILL BE REQUIRED. Campers without a mask available will be provided one by Camp Staff.

CAMPSITE CAPACITIES

While events are currently being managed at roughly 50% capacity, that attendance limit may be adjusted on an event-by-event basis, with likely expansion to event capacities being made permanent in the fall. Campers and Staff are asked to consider the following adjustments to their campsite capacities to ensure distancing while at camp:

- Campers are encouraged to maintain a “one camper, one tent” approach while in camp; alternately, adjusting sleeping arrangements to manage 3-6 feet of distance between campers and provide good overnight ventilation is recommended.
- Adults using the “Leaders Quarters” in Activity Shelters and Camp La-No-Che should consider limiting capacity to 50% for comfort and spacing.
- Use of Adirondack sites at Camp la-No-Che should follow the same guidance as above to manage camper personal space.
- Units attending large events, including summer camp, should plan to bring additional tents to help manage spacing of campers; campsites at Camp La-No-Che have a limited number of camper tents available. Camp also maintains a number of dome-style tents that are available for check out from the Quartermaster if a unit requires additional accommodations.
